ProductBeacon Research

The main stories

- **Fortinet and F5 shares each fell about 20% in a day after their results, by our calculation.** Both beat quarterly revenue and profit forecasts. Fortinet cut its service-revenue outlook; F5 guided to 8% to 9% growth next year.
- **Upwind raised $400 million at a $3.8 billion valuation.** TechCrunch, citing a person familiar with Upwind, says Datadog did not offer more than that, so Upwind stayed independent. Datadog has made no statement.
- **Microsoft delayed general availability of its data loss prevention for non-Microsoft apps to late December.** It was due in late October and is still in preview. This is the second delay.
- **Cyera is in early talks to raise money at a $20 billion valuation, The Information reports.** Cyera declined to comment. It did confirm US government certification at the highest impact level.
- **Microsoft says agents in its registry grew over 30% in a quarter to more than 50 million,** about the figure it gave in September. Its results release has no security revenue line.
- **CrowdStrike, Cisco, Cato Networks and Island each added controls for AI agents to their existing platforms.** Cato's comes as a new endpoint client.

Our view: large vendors keep selling AI-agent controls as features of existing products. That adds to the evidence against our prediction that securing agents' tool calls becomes a separate market. Gartner's new profile for agent security, as vendors describe it, points the other way.

Results and shares

Fortinet and F5 fall about 20% after results

- **Fortinet** says third-quarter revenue grew 20% to $2.08 billion and billings 29% to $2.34 billion. It raised its 2026 revenue outlook to $8.125 billion to $8.215 billion.
- It lowered its 2026 service-revenue outlook to $5.150 billion to $5.170 billion, from $5.18 billion to $5.22 billion, SiliconANGLE reports.
- Bloomberg Intelligence, quoted by Yahoo Finance, says the cut "implies lower attach rates" for bundled networking and secure-edge products sold with Fortinet's firewalls.
- Fortinet shares fell 20.1% on 29 October, by our calculation. Calcalist says the sell-off pulled down Palo Alto Networks, CrowdStrike and Zscaler.
- **F5** says fourth-quarter revenue grew 13% to $917 million and product revenue 23%. It guided to 8% to 9% revenue growth for its 2027 fiscal year.
- F5 shares fell 20.4% on 28 October, by our calculation.
- **Watch:** Check Point reports on 2 November, Cloudflare and Akamai on 5 November.

Sources: Fortinet results (SEC filing), StockStory (F5), SiliconANGLE, Yahoo Finance, Calcalist, F5 results (SEC filing).

Microsoft gives agent numbers, no security revenue line

- Microsoft's results release has no security revenue line. Microsoft Cloud revenue was $63.9 billion, up 30%.
- On the call, Satya Nadella said "over 50 million agents are now in the registry", and that customers have used Purview to audit "over 7.6 billion agent activities to date".
- He said E7, which "brings together Copilot, E5, Entra and Agent 365", has "thousands of customers".

Sources: Microsoft, call transcript (Motley Fool).

Tenable beats; shares rise

- Tenable says third-quarter revenue grew 9.5% to $276.4 million. It expects $1.084 billion to $1.087 billion for 2026.
- Tenable shares rose 6.3% on 29 October, by our calculation.

Cyber shares, 23 to 30 October

Company	Change	Note
F5	**-25.7%**	Results 27 October
Fortinet	**-24.4%**	Results 28 October
Cloudflare	-13.8%	Results due 5 November
Zscaler	-6.8%	
Check Point	-4.4%	Results due 2 November
Palo Alto Networks	-3.9%	
CrowdStrike	-2.8%	
Okta	-2.3%	Joins the S&P 500 on 4 November
Microsoft	-0.5%	Results 28 October
Netskope	+0.1%	
SentinelOne	+4.8%	
Rapid7	+11.1%	Results due 4 November

Company	Change	Note
Tenable	**+13.8%**	Results 28 October
Nasdaq Composite	-2.0%	

- All changes are our calculation from daily closing prices. StockStory, citing CNBC, links the 30 October fall to weak results from Amazon and Intel.

Deals and funding

Upwind raises $400 million and stays independent

- Upwind says it closed a $400 million Series C at a $3.8 billion valuation, led by Bessemer Venture Partners. It says revenue has quadrupled in 2026.
- TechCrunch, citing a person familiar with Upwind, says Datadog "didn't offer a premium above the $3.8 billion valuation", so Upwind stayed independent.
- This settles last week's conflicting reports only partly. Datadog has made no statement, and Calcalist had reported that the reported offer of nearly $4 billion "was not made".
- Upwind secures cloud systems and AI agents while they run.

Sources: SecurityWeek, TechCrunch, SiliconANGLE.

Cyera: $20 billion talks reported; government certification confirmed

- Cyera has held "preliminary discussions" with investors at a $20 billion valuation, Calcalist reports, citing The Information. Talks "do not necessarily mean" a round will follow. Cyera declined to comment.
- Cyera was valued at $12 billion in June.
- Cyera says it achieved "FedRAMP Class D Certified status", formerly called FedRAMP High, and cites "multiple Authorizations to Operate". The US government register still lists no agency authorizations.
- Kiteworks now enforces Cyera's data labels on email, file transfers and AI integrations, SecurityMEA reports.

Sources: Calcalist, Dealroom, Cyera via Business Wire, FedRAMP Marketplace, SecurityMEA.

Funding at a glance

Company	Round	What it does
Upwind	$400M Series C at $3.8B	Cloud and AI-agent runtime security
Infisical	$40M Series B at $600M	Secrets, and AI-agent access without shared passwords
Mintive	$7M seed	Identities and a tool-call gateway for AI agents
Northstar Security	$7M seed	A map of security data that AI agents use to investigate

Sources: Infisical, ID Tech, Northstar Security.

Deals still open

- **Proofpoint and Varonis:** no new filing since 22 October and no vote date yet. Varonis shares closed 1.8% below the $49.75 offer on 30 October, by our calculation.
- **CrowdStrike and Orion Security; OpenAI and Trail of Bits:** still unconfirmed.

Sources: SEC filings (Varonis), Yahoo Finance prices.

Data security and insider risk

Microsoft delays Purview data loss prevention for non-Microsoft apps

- Microsoft now plans general availability "in late December 2026 (previously late October)". It first planned early September.
- The controls cover Google Workspace, Box, Dropbox, Salesforce, ServiceNow, Amazon Web Services and Cisco Webex. Usage is billed on a pay-as-you-go meter.
- Microsoft also pushed back two other Purview data-security dates the same week.
- **Why it matters:** specialist data-loss vendors keep this opening for two more months.

Sources: Microsoft message (archived copy), Microsoft Learn.

Proofpoint shows its email detections inside Microsoft Defender

- Proofpoint joined Microsoft's integrated cloud email security program. Customers can "view Proofpoint detections directly within the Microsoft Defender portal".
- It formally launched Proofpoint Flex. Qualifying customers can move committed spending between Proofpoint products at contract anniversaries.

- **Our view:** Microsoft's console is becoming the place where security teams work, even with a specialist they keep.

Sources: Proofpoint (Microsoft program), Proofpoint (Flex).

Other data-security and insider-risk news

- **University of California** is replacing Trellix endpoint security with CrowdStrike Falcon across its system. UCLA will retire Trellix by the end of May 2027.
- **Mimecast** says its Incydr Investigation Agent, which sorts insider-risk alerts, is now generally available. Customers can buy extra AI credits.
- **Mimecast** and **Global Relay** each say Gartner named them a Leader for communications governance and archiving.

Sources: UCLA, Mimecast support, Mimecast, Global Relay.

AI agents and security operations

Large vendors add agent controls to existing products

- **CrowdStrike** extended its managed threat hunting to AI agents monitored by Falcon Guardian. It says a gateway "on its own" cannot see what agents do on the machine.
- **Cisco** open-sourced Project Quarry, rules for spotting AI-agent attacks hidden in harmless-looking steps. Cisco says it already runs in Cisco AI Defense, Futurum reports.
- **Cato Networks** launched Cato AI Endpoint, a new endpoint client. It sends only AI traffic to Cato and works alongside a rival's secure edge. It gave no availability date.
- **Island** introduced an enterprise browser for AI agents, with policy over the tools they call. It gave no availability date.
- **ServiceNow** named HiddenLayer, WitnessAI and Zenity, three AI-security specialists, as founding members of an alliance around its AI control product.

Sources: CrowdStrike, CrowdStrike (threat hunting), SecurityWeek, Futurum, Cato Networks, Island, ServiceNow.

Gartner profiles agent security, vendors say

- Straiker says two Gartner Hype Cycle reports published on 12 October list "Agentic AI Security" as a category. Akto says Gartner also profiles "AI Runtime Defense".
- We have not seen the reports. A Hype Cycle profile is not a market ranking.

Sources: Straiker, Akto.

Other security-operations news

- **Arctic Wolf** says AI now resolves 60% of investigations in its managed service. Investigations handled by people alone fell to 2%, it says.
- **SentinelOne** plans to add Anthropic's Claude Mythos 5.1 to its Wayfinder Frontier AI Services.
- **Google** says it will make Gemini 4 Carbon available to a subset of cyber defenders from this week. It says the model has "state-of-the-art cybersecurity" capabilities. **Orange Cyberdefense** will build services on a security-tuned version of Mistral Large 4.
- **Splunk's** AI Toolkit release notes on Splunkbase, dated 13 July, call Agent Launchpad generally available. Our earlier editions said it had no dated general availability.

Sources: Arctic Wolf, SentinelOne, Google, Reuters, Splunkbase.

Secure edge

- **Netskope's** release notes, dated 5 October, list Agent Action Control as generally available. Our earlier editions quoted only its feature page, which said beta until this week.
- **Check Point** will sell its firewalls as a subscription from 1 November, through partners.

Sources: Netskope release notes, Check Point.

Identity

- **Okta** joins the S&P 500 before trading on 4 November, S&P Dow Jones Indices says.
- **Palo Alto Networks** says Gartner named it a Leader for privileged access, furthest on vision. It is the first such placement since CyberArk joined it. **BeyondTrust** says it placed highest for ability to execute.
- **IBM** made its Agent Identity product generally available. **Aembit** says a kill switch for AI agents is now available; Okta's is still "coming soon".
- **Saviynt** says it achieved the same federal certification level as Cyera.

Sources: Investing News Network, Palo Alto Networks, BeyondTrust, IBM, Aembit, Okta, Saviynt via GlobeNewswire.

Stories to watch

- **Results:** Check Point, 2 November; Varonis, 3 November; Rapid7, 4 November; Cloudflare and Akamai, 5 November; Qualys, 9 November.
- **RSA Agent ID:** two parts planned for 16 November. **Microsoft Ignite:** 17 to 20 November.
- **Microsoft Purview** controls for non-Microsoft apps: now late December.
- **New names:** Infisical, Mintive and Northstar Security.

Sources: Check Point, Rapid7, Qualys, RSA, Microsoft Ignite.
