Microsoft previews SIEM features in Defender

- **Microsoft calls it "a benefit"** for Microsoft 365 E5, E7 and Defender Suite customers, not a new product. SIEM means security information and event management.
- **It is a preview**, open now to customers without Microsoft Sentinel. Sentinel customers may move from 15 November.
- **Microsoft's own security data is included.** Microsoft lists \$2.40 per GB for data from other vendors from 1 October; regional prices may vary.
- **Our view:** independent SIEM vendors now face a bundled offer and a published price in many of the same accounts.

Okta launches AI-agent features at Oktane

- **Generally available now, Okta says:** Agent SSO (single sign-on for agents), Agent-to-Agent Connections and Resource Access Certifications.
- **Planned for this quarter:** Agent Gateway, which sits between agents and the tools they call.
- **Later, per Okta's investor sheet:** the kill switch is planned to reach the gateway in the fourth quarter, and finding unmanaged agents on employee devices by early 2027. The press release gave an earlier date for the second.
- **Pricing:** on a few large deals, which he called a small sample, the chief executive said agent security added 1 to 1.5 for every 4 of platform.

— IDENTITY

Okta and 11 companies form the Blueprint Alliance

- **Members:** Amazon Web Services, CrowdStrike, Databricks, Docker, Google Cloud, Lovable, Proofpoint, Salesforce, ServiceNow, Wiz and Zscaler.
- **Shared principles:** each agent has its own identity, access fits the task, and access can be cut off instantly.
- **Okta calls it an open reference design** for many vendors.
- **Our view:** CrowdStrike joined despite its own agent-identity product. Microsoft, Palo Alto Networks, Cisco and SailPoint did not.

— FUNDING

Cyera and Island raise \$400 million each

- **Cyera:** \$400 million from Goldman Sachs Alternatives, extending its Series G. Cyera says it is valued at over \$12 billion. In June it announced \$12 billion.
- **Island:** a \$400 million Series F at a \$6.4 billion valuation. Island began with a secure enterprise browser.
- **Island's chief executive says** it has since built a secure-edge network design from the user's device outward.
- **Evolution Equity Partners** led Island's round and Cyera's Series G.

Zscaler changes its sales chief

- **Ross Tackett becomes Chief Revenue Officer on 1 October.** Mike Rich steps down and advises the company until 31 December.
- **Zscaler's release cites personal reasons.** Its filing gives no reason.
- **Shares fell 8.6% on Friday morning,** Proactive reports.
- **Watch:** Zscaler's Investor Day on 6 October.

— DATA SECURITY

Proofpoint plans a data and AI security system

- **Proofpoint announced agents** that detect, investigate and fix data risks, plus rules written in plain language.
- **Proofpoint expects them** "to be available by year-end 2026".
- **Available now, Proofpoint says:** four of its data-security products on AWS Marketplace.
- **Reported talks to buy Varonis remain unconfirmed.** Varonis has filed nothing with the US securities regulator since 29 July.

— ACQUISITIONS

Accenture's Dragos deals are complete

- **Accenture's June announcement now says** NetRise closed on 31 July, the Dragos stake on 16 September and runZero on 17 September.
- **Correction:** our 19 September summary said Accenture had published no completion notice. It had.
- **Omada acquired EmpowerID**, which it says controls what AI agents may do in real time. Omada gave no terms.
- **Upwind is acquiring Aegis**, an AI-agent security start-up. Calcalist reports a stock deal worth tens of millions of dollars.
